

Dear TiME supporter,

This month, we invite you to get to know more about Río Roberto (**Ecuador**) and the healing hub of Nuestra Tierra Aldea Creativa, which brings together science, conservation and Indigenous knowledge with one goal: healing the connection between us and the forest and between one another.

Our 2026 TiME campaign is in full swing, featuring [IKIAM Reserve \(Ecuador\)](#) and [Rocha Bros \(Brazil\)](#), in addition to [Río Roberto](#). Cast your vote now!

The teddy bear of the cloud forest

The teddy bear you see in the photo is the Olinguito, a species that became known to science only in 2013. It lives on the slopes of the Andean cloud forest, an extremely biodiverse region that faces a severe threat of deforestation. The forest is so biodiverse and full of endemic species that a failure to save it could potentially mean some species would become extinct before we got the opportunity to know them.

One of the threatened habitats of TIME's 2026 campaign is a pristine, hard-to-access portion of the cloud forest, where the only human trace is ancient paths of a long-lost culture. By voting for Río Roberto, you can save not only the Near Threatened Olinguito, but many other unique, endangered and wonderful species.
